

GROW A GRASS HEAD

1 Cut tights or nylons.

2 Stretch over a mug.

3 Put grass seed in.

4 Put in potting soil.

5 Tie it shut.

6 Put a face on.

Get the soil a little wet. You can dunk your grass head in water or use a spray bottle. Set on top of a container and add water. Place your creation near sunlight and watch it grow. Add more water to your container and spray your grass head with a little water if it gets dry. You should see hair starting to sprout in about 1 week. You can give your grass head a hair cut, pigtails or create a new style .

EGG FACE GRASS HEAD

1 Draw or glue a face on the egg shells .

2 Put potting soil in.

3 Put grass seed in.

4 Spray them with water.

Spray to water everyday. Watch your egg face grass head grow hair. Give it a hair cut if you want to!
